PROFESSIONAL SUMMARY

Front-End Developer specializing in React.js, Next.js, and TypeScript with experience building responsive, scalable, and user-friendly web applications. Skilled in developing modern interfaces using component-based architecture, integrating APIs, implementing authentication systems, and deploying production-ready applications. Strong understanding of responsive design, clean code practices, and modern frontend development workflows. Passionate about creating high-quality digital experiences and continuously improving technical skills while pursuing a Bachelor of Science in Computer Science.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frontend Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Bootstrap

Tools & Technologies: Git, GitHub, Vercel, Clerk Authentication, REST API Integration, VS Code, npm

Development Skills: Responsive Web Development, Component-Based Architecture, UI Development, Dynamic Routing, Authentication & Authorization, API Integration, Performance Optimization, Problem Solving

PROJECTS

Mentoro – E-Learning & Course Management Platform

Role: Solo Front-End Developer | Live Demo: mentoro-orpin.vercel.app

- Developed a fully responsive e-learning platform using React.js, Next.js, TypeScript, and Tailwind CSS.
- Designed modern role-based interfaces for students and teachers with focus on usability and accessibility.
- Implemented secure authentication and user management using Clerk Authentication.
- Built protected routes to manage authorized access to platform features.
- Developed reusable components following modern React development practices.
- Created dashboard interfaces for managing courses, students, and educational content.
- Integrated REST APIs for dynamic data handling and improved application functionality.
- Implemented dynamic routing for smooth navigation across different sections.
- Optimized layouts for desktop, tablet, and mobile responsiveness.
- Deployed and maintained the application using Vercel.
- Managed project source code and version control using Git and GitHub.

Technologies Used: React.js, Next.js, TypeScript, Tailwind CSS, Clerk Authentication, REST APIs, Git, GitHub, Vercel

EDUCATION

Bachelor of Science in Computer Science (BSCS)

National University of Modern Languages (NUML), Islamabad — Expected Graduation: 2030

Intermediate (Pre-Engineering)

ILM College, Islamabad — Completed: 2026

CERTIFICATION

Web Development Professional Training Program (4 Months)

Bano Qabil Institute | 2026

- Completed intensive web development training focused on modern frontend technologies.
- Developed practical skills in HTML, CSS, JavaScript, React.js, responsive design, Git, and GitHub.
- Built hands-on projects focused on creating interactive and responsive web applications.
